Portfolio: adityasridhar.com

SUMMARY

Software Developer and Integrated M.Tech (CSE) student seeking a fresher role to apply problem solving skills, programming expertise, and a continuous learning mindset in a professional software development environment.

EDUCATION

Noida Institute of Engineering Technology <i>Master of Integrated Technology in Computer Science and Engineering</i> Courses: Operating Systems, Data Structures and Algorithms, Artificial Intelligence, Machine Learning, Computer Network, DBMS	Greater Noida, UP 2022–2027
Ramjas School RKP <i>Senior Secondary Education</i>	RK Puram, Delhi 2020–2021
Chinmaya Vidyalaya <i>Secondary Education</i>	Vasant Vihar, Delhi 2018–2019

EXPERIENCE

Codec <i>Java Development Intern</i>	Remote Aug 2025 – Sep 2025
- Built Java applications using OOP principles and SDLC practices, cutting code duplication by 30%. - Designed a scalable Swing based desktop application handling 20+ concurrent user interaction scenarios. - Optimized input processing and control flow logic, improving execution performance by 25%.	
InternPe <i>Python Development Intern</i>	Remote Oct 2024 – Nov 2024
- Wrote modular, well documented Python programs to automate data processing and computational tasks. - Applied data transformation pipelines and decision logic to improve accuracy and execution efficiency by 20%, resolving logic defects in existing Python routines.	

PROJECTS

E-Waste Management Website	Jan 2025
- Developed a responsive web application to automate e waste pickup workflows, reducing manual coordination by 40%. - Implemented routing logic to connect users with refurbishment centers, eliminating intermediaries. - Improved usability by building reusable UI components and streamlining navigation flow by 30%. - Tech Stack and Version Control: HTML, CSS, JavaScript, REST API, Git GitHub: github.com/Ady-OZz/EWMS	
Student Admission System	Aug 2025
- Created a Java Swing based admission management system to support student onboarding and administrative operations. - Secured authentication using MD5 hashing and access control mechanisms to protect database operations. - Enabled real time record retrieval and updates via JDBC and MySQL, scaling backend services by 15%. - Tech Stack and Version Control: Java, Swing, JDBC, MySQL, Git GitHub: github.com/Ady-OZz/StudentAdmission	
Budget Tracker Application	Oct 2024
Integrated frontend, backend, and database layers to support end to end application functionality, automating expense tracking and cutting task completion time by 35%. GitHub: github.com/Ady-OZz/Expense-Tracker	
Jravel AI Powered Travel Planner	May 2026
- Engineered a full stack travel planner enabling collaborative trip management with real time itinerary updates. - Configured a 2 agent Gemini AI workflow that generated personalized destinations to reduced trip planning effort by 60%. - Integrated Firebase Auth, Firestore, and realtime chat to improve secure collaboration efficiency by 45%. - Tech Stack and Version Control: React, Firebase, Gemini AI, Maps, REST API, Git GitHub: Jravel AI	

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS, REST APIs
Tools: Docker, Git, PostgreSQL, Linux, MySQL, VS Code
Libraries: Pandas, NumPy, Matplotlib, TensorFlow
Core Concepts: Data Structures and Algorithms, Object Oriented Programming, System Design, SDLC, Agile

PUBLICATIONS

Research Paper: Authored a research paper titled "Design and Development of an AI Enabled Collaborative Travel Planning Platform", currently under preparation for submission.
Technical Book: Co authoring "Web Based E Waste Management System", proposed for publication with Packt Publishing.

ACHIEVEMENTS

Competitive Programming: Solved 200+ problems on LeetCode, strengthening problem solving and algorithmic optimization skills.
Full Stack and Java Projects: Delivered multiple production ready applications integrating full stack web development with OOP and SDLC best practices.
Hackathons: Competed in multiple hackathons applying real world software engineering under time constraints, including the FinTech Hackathon at IIIT Delhi and the Facebook Developers Circle Hackathon.
